

UNIT 5: MATTER AND HOW IT CHANGES

Watch this video about the **states of matter**:

<https://youtu.be/DE3LCPfP8N8>

→ Matter has two fundamental properties: **mass** and **volume**.

→ Matter can be in three states: **solid**, **liquid** and **gas**.

→ Characteristics*:

	SOLID	LIQUID	GAS
VOLUME	fixed	fixed	variable
MASS	fixed	variable	variable

*fixed: *fijo, que no cambia* / variable: *que cambia*

→ Changes of state:

- From solid to liquid: **melting**
- From liquid to solid: **solidification**
- From liquid to gas: **evaporation**
- From gas to liquid: **condensation**
