

SCIENCE: ***ANSWERS***

ANIMALS (UNIT 2) pages 26-27

1. Watch this video about **fish**:

<https://youtu.be/TJN3gJoZqIY>

According to the video, what are the **main characteristics** of fish?

- Fish live in water (salt water or fresh water)
- They are vertebrates
- They are cold-blooded
- They have fins
- They are covered in scales
- They breathe with gills
- They are oviparous
- Most fish are carnivorous

2. Tell me **similarities** and **differences** between **fish** and **amphibians**.

Both: *ambos, los dos... (usado para cosas en común)*

While...: *mientras que... (usado para comparar)*

- ✓ Similarities:
 - **Both** fish and amphibians live in water
 - Both groups of vertebrates are oviparous and cold-blooded
 - Most of them are carnivorous
 - Both fish and young amphibians breathe with gills
- ✓ Differences:
 - Fish are covered in scales **while** amphibians have got a thin skin
 - Amphibians breathe with gills, lungs and through the skin while fish breathe (in general) only with gills
 - Fish can only live in water while amphibians can live out of the water
