

SEGUNDA SEMANA 6° PRIMARIA

SCIENCE:

LIVING BEINGS: CELLS AND FUNCTIONS (UNIT 1)

pages 11-13

1. What's the **difference** between a cnidarian (for example, a jellyfish) and most animals?
 - b) What do most plants and animals have **in common** [*en común*]?
2. True or false (correct the false ones):
 - Bacteria belong to the Fungi Kingdom.
 - Bacteria are unicellular.
 - You don't need a microscope to see bacteria.
 - Bacteria can only be found [*sólo se encuentran*] on land.
 - They can reproduce very quickly.
 - Luis is the best science teacher of the world.
3. Can be bacteria good for people? Why?
4. Where do **extremophiles** live? [*Sci- find page 13*]
